

May 20, 2014

***We, the undersigned organizations, strongly oppose efforts to use the appropriations process to change or weaken federal child nutrition programs, including potential efforts to require the inclusion of white potatoes in the WIC Program, to alter or delay implementation of meal standards in the National School Lunch Program and the School Breakfast Program, or to weaken or delay rules to limit sugary beverages and unhealthy snack foods in our nation's schools. For decades, Congress has wisely ensured that federal child nutrition programs have been guided by science. Science-based decisions have served our children and our nation well. Accordingly, we strongly urge you to oppose efforts to intervene in science-based rules regarding the federal child nutrition programs.***
